Recycling and Waste Reduction Tips

How to Recycle at Home

Make recycling an easy part of your daily routine with these simple guidelines.

Select storage locations – Collect recyclables where they're generated by conveniently placing bins in the kitchen, home office, and garage.

Select storage containers – Make sure that your recycling and trash containers look different from each other. Stackable plastic bins, crates, boxes and grocery bags make good indoor containers. When full, empty them into your City-issued blue bin.

How to prepare items – Remove lids. Flatten cardboard. Although rinsing containers out is not required, it may deter bugs.

What to do with...?

There are some items **not** accepted in the blue bin that can still be recycled:

Donate clothes and household items – If in good condition, these items can be donated to local thrift stores and nonprofit groups to be repaired and reused.

Recycle paper and plastic shopping bags – Most grocery stores in California have bins for recycling plastic bags, and paper bags can be recycled in your blue bin. Avoid single-use shopping bags altogether by using durable bags, and prevent tons of unnecessary paper and plastic bags from being produced and discarded.

Reuse Styrofoam Packing Products – Try reusing Styrofoam for packing at home. If you can't use the peanuts, many shipping stores will reuse them. Some do not accept molded Styrofoam.

Recycling Household Hazardous Waste and Universal Waste

It is against the law to dispose of household hazardous waste (HHW) or universal waste in any refuse container.

HHW includes: used motor oil, antifreeze, oil filters, and latex paint.

Universal Waste includes: consumer batteries, electronic devices, fluorescent bulbs, and items containing mercury.

Proper disposal and recycling options vary.
